Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will Nancey Murphy, Warren S. Brown

If humans are purely physical, and if it is the brain that does the work formerly assigned to the mind or soul, then how can it fail to be the case that all of our thoughts and actions are determined by the laws of neurobiology? If this is the case, then free will, moral responsibility, and, indeed, reason itself would appear to be in jeopardy. Nancey Murphy and Warren S. Brown here defend a non-reductive version of physicalism whereby humans are (sometimes) the authors of their own thoughts and actions.

Did My Neurons Make Me Do It? brings together insights from both philosophy and the cognitive neurosciences to defeat neurobiological reductionism. One resource is a "post-Cartesian" account of mind as essentially embodied and constituted by action-feedback-evaluation-action loops in the environment, and "scaffolded" by cultural resources. Another is a non-mysterious account of downward (mental) causation explained in terms of a complex, higher-order system exercising constraints on lower-level causal processes. These resources are intrinsically related: the embeddedness of brain events in action-feedback loops is the key to their mentality, and those broader systems have causal effects on the brain itself.

With these resources Murphy and Brown take on two problems in philosophy of mind: a response to the charges that physicalists cannot account for the meaningfulness of language nor the causal efficacy of the mental qua mental. Solutions to these problems are a prerequisite to addressing the central problem of the book: how can biological organisms be free and morally responsible? The authors argue that the free-will problem is badly framed if it is put in terms of neurobiological determinism; the real issue is neurobiological reductionism. If it is indeed possible to make sense of the notion of downward causation, then the relevant question is whether humans exert downward causation over some of their own parts and processes. If all organisms do this to some extent, what needs to be added to this animalian flexibility to constitute free and responsible action? The keys are sophisticated language and hierarchically ordered cognitive processes allowing (mature) humans to evaluate their own actions, motives, goals, and rational and moral principles.

From reader reviews:

Sandra Kelley:

Book will be written, printed, or descriptive for everything. You can realize everything you want by a reserve. Book has a different type. As we know that book is important point to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A e-book Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will will make you to become smarter. You can feel much more confidence if you can know about anything. But some of you think that open or reading a new book make you bored. It isn't make you fun. Why they may be thought like that? Have you searching for best book or acceptable book with you?

Cary Freeman:

The book Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will has a lot details on it. So when you make sure to read this book you can get a lot of benefit. The book was published by the very famous author. Tom makes some research just before write this book. This specific book very easy to read you may get the point easily after scanning this book.

Jennifer Buster:

Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will can be one of your starter books that are good idea. Many of us recommend that straight away because this publication has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to set every word into enjoyment arrangement in writing Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will nevertheless doesn't forget the main level, giving the reader the hottest and based confirm resource facts that maybe you can be one of it. This great information may drawn you into new stage of crucial pondering.

Mark Authement:

Your reading sixth sense will not betray an individual, why because this Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will e-book written by well-known writer who really knows well how to make book that could be understand by anyone who all read the book. Written inside good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still skepticism Did My Neurons Make Me Do It?: Philosophical and Neurobiological Perspectives on Moral Responsibility and Free Will as good book not just by the cover but also through the content. This is one guide that can break don't judge book by its include, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading through sixth sense already said so why you have to listening to one more sixth sense.
