## **Doing Social Research** Leonard Cargan

Doing Social Research is an easy-to-understand guidebook for readers who have little or no knowledge of the social research process. Written in a clear, straightforward style, this book presents the various topics of social research in the outline form of all sociological research articles: starting with an introduction to the problem being researched, why the problem was chosen, and the theoretical premises of the chosen topic, then progressing to the methods utilized to collect the data, the analysis of the data, and the presentation of the material. By following the research outline, the book provides a concise overview of the most important elements of social research, and as an added bonus, synopses of classical studies introduce readers to the early pioneers of social research.
