Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) Srinivas Sajja, Priti

The Internet has become an integral part of human life, yet the web still utilizes mundane interfaces to the physical world, which makes Internet operations somewhat mechanical, tedious, and less human-oriented. Filling a large void in the literature, **Intelligent Technologies for Web Applications** is one of the first books to focus on providing vital fundamental and advanced guidance in the area of Web intelligence for beginners and researchers.

The book covers techniques from diverse areas of research, including:

- Natural language processing
- Information extraction, retrieval, and filtering
- Knowledge representation and management
- Machine learning
- Databases
- Data, web, and text mining
- Human–computer interaction
- Semantic web technologies

To develop effective and intelligent web applications and services, it is critical to discover useful knowledge through analyzing large amounts of content, hidden content structures, or usage patterns of web data resources. Intended to improve and reinforce problem-solving methods in this area, this book delves into the hybridization of artificial intelligence (AI) and web technologies to help simplify complex Web operations. It introduces readers to the state-of-the-art development of web intelligence techniques and teaches how to apply these techniques to develop the next generation of intelligent Web applications.

The book lays out presented projects, case studies, and innovative ideas, which readers can explore independently as standalone research projects. This material facilitates experimentation with the book's content by including fundamental tools, research directions, practice questions, and additional reading.

From reader reviews:

Rita Carter:

Inside other case, little persons like to read book Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). You can choose the best book if you want reading a book. As long as we know about how is important a new book Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). You can add understanding and of course you can around the world by way of a book. Absolutely right, since from book you can learn everything! From your country until finally foreign or abroad you will find yourself known. About simple issue until wonderful thing it is possible to know that. In this era, we can open a book or maybe searching by internet gadget. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's read.

Frederick Rothman:

The event that you get from Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) may be the more deep you digging the information that hide into the words the more you get considering reading it. It does not mean that this book is hard to know but Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) giving you enjoyment feeling of reading. The article writer conveys their point in a number of way that can be understood by anyone who read that because the author of this book is well-known enough. This kind of book also makes your current vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) instantly.

Ernest Bryan:

This book untitled Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) to be one of several books in which best seller in this year, this is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy that book in the book retailer or you can order it by way of online. The publisher of this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Mobile phone. So there is no reason to you personally to past this book from your list.

Kelley Hardy:

In this period of time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The book that

recommended to you is Intelligent Technologies for Web Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) this e-book consist a lot of the information of the condition of this world now. This particular book was represented just how can the world has grown up. The language styles that writer value to explain it is easy to understand. The actual writer made some research when he makes this book. That is why this book suited all of you.
