Language and Music as Cognitive Systems Patrick Rebuschat, Martin Rohmeier, John A. Hawkins, Ian Cross

The past 15 years have witnessed an increasing interest in the comparative study of language and music as cognitive systems. Language and music are uniquely human traits, so it is not surprising that this interest spans practically all branches of cognitive science, including psychology, computer science, linguistics, cognitive neuroscience, and education. Underlying the study of language and music is the assumption that the comparison of these two domains can shed

light on the structural and functional properties of each, while also serving as a test case for theories of how the mind and, ultimately, the brain work.

This book presents an interdisciplinary study of language and music, bringing together a team of leading specialists across these fields. The volume is structured around four core areas in which the study of music and language has been particularly fruitful: (i) structural comparisons, (ii) evolution, (iii) learning and processing, and (iv) neuroscience. As such it provides a snapshot of the different research strands that have focused on language and music, identifying current trends and methodologies that have been (or could be) applied to the study of both domains, and outlining future research directions. This volume is valuable in promoting the investigation of language and music by fostering interdisciplinary discussion and collaboration.

With an ever increasing interest in both music cognition and language, this book will be valuable for students and researchers of psychology, linguistics, neuroscience, and musicology.

From reader reviews:

Leslie Padilla:

Information is provisions for those to get better life, information currently can get by anyone from everywhere. The information can be a know-how or any news even an issue. What people must be consider any time those information which is from the former life are challenging be find than now could be taking seriously which one would work to believe or which one typically the resource are convinced. If you have the unstable resource then you get it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Language and Music as Cognitive Systems as the daily resource information.

Carol Hamilton:

Playing with family in a very park, coming to see the water world or hanging out with friends is thing that usually you might have done when you have spare time, subsequently why you don't try thing that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Language and Music as Cognitive Systems, you are able to enjoy both. It is fine combination right, you still want to miss it? What kind of hang-out type is it? Oh come on its mind hangout people. What? Still don't have it, oh come on its known as reading friends.

Brandi Johnson:

Many people spending their time frame by playing outside having friends, fun activity with family or just watching TV the whole day. You can have new activity to spend your whole day by reading through a book. Ugh, do you consider reading a book can actually hard because you have to take the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Cell phone. Like Language and Music as Cognitive Systems which is getting the e-book version. So , try out this book? Let's notice.

James Bouchard:

A lot of reserve has printed but it differs from the others. You can get it by world wide web on social media. You can choose the most effective book for you, science, comic, novel, or whatever by searching from it. It is referred to as of book Language and Music as Cognitive Systems. You can include your knowledge by it. Without causing the printed book, it may add your knowledge and make a person happier to read. It is most significant that, you must aware about reserve. It can bring you from one place to other place.
