## The Evolution of Adam, What the Bible Does and Doesn't Say about Human Origins Peter Enns Can Christianity and Evolution Coexist?

"This is a bold, honest, and direct approach to the questions of origins and the interpretation of the Bible. Pete has battle scars from the journey to his conclusions in *The Evolution of Adam*, but those battles have made him increasingly sensitive to the plight of the church's struggle with science and the Bible. Here is a theologically alert, pastorally sound, and exegetically informed book that will lead us onward."

--**Scot McKnight**, Northern Seminary

"The question of the historical Adam is an urgent issue in biblical interpretation and theology today. Recent developments in biology have indicated with impressive evidence that humanity does not go back to a single human couple. Does that mean that the Bible is wrong or that science is wrong? Or perhaps, as Peter Enns argues, we have been misreading the Bible. While not everyone, including myself, agrees with everything that Enns suggests, his book is an important contribution to the discussion concerning Genesis 1-2 and science."

--**Tremper Longman III**, Westmont College

"*The Evolution of Adam* not only reflects the evolution of evangelical understandings of Adam, but it also contributes to new perspectives on Paul and the gospel of Jesus Christ. No one concerned with the beauty, glory, and truth of the good news in a scientific world will want to miss out on this landmark book!"

--**Amos Yong**, Fuller Theological Seminary

"*The Evolution of Adam* provides a sure-footed and engaging look at what the Bible says--and does not say--about the first man. Peter Enns, one of America's most important Old Testament scholars, provides a masterful and accessible survey of the relevant biblical scholarship from the past couple of centuries. Enns combines a deep appreciation of the Christian tradition with a courageous willingness to go where most evangelicals fear to tread. I highly recommend this book."

--**Karl Giberson**, author of *Saving Darwin: How to Be a Christian and Believe in Evolution*
