In Detail

JIRA provides issue and project tracking for software development teams to improve code quality and the speed of development. With the new version of JIRA, you can create your own JIRA plugins and customize the look and feel of your JIRA UI.

"JIRA 7.x Development Cookbook" is a one-stop resource to master extensions and customizations in JIRA. This book starts with recipes on simplifying the plugin development process followed by recipes dedicated to the plugin framework, which allows you to master plugins in JIRA. Then you will move on to writing custom field plugins to create new field types or custom searchers. You will also learn how to program and customize workflows to transform JIRA into a user-friendly system.

With so much data spanning across different projects, issues, and so on (and a lot of planning done for the project), we will cover how to work on reports and gadgets to get customized data according to our needs. We will then explore customizing the various search aspects of JIRA such as JQL, searching in plugins, managing filters, and so on. This book will emphasize programming issues, such as creating, editing, and deleting issues; creating new issue operations; managing the various other operations available on issues via

JIRA APIs; and so on.

At the end of the book, you will learn how to customize JIRA by adding new tabs, menus, and web items; communicate with JIRA via the REST, SOAP, or XML/RPC interfaces; and work with the JIRA database.
