Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) Mark Burry

With scripting, computer programming becomes integral to the digital design process. It provides unique opportunities for innovation, enabling the designer to customise the software around their own predilections and modes of working. It liberates the designer by automating many routine aspects and repetitive activities of the design process, freeing-up the designer to spend more time on design thinking. Software that is modified through scripting offers a range of speculations that are not possible using the software only as the manufacturers intended it to be used. There are also significant economic benefits to automating routines and coupling them with emerging digital fabrication technologies, as time is saved at the front-end and new file-to-factory protocols can be taken advantage of. Most significantly perhaps, scripting as a computing program overlay enables the tool user (designer) to become the new tool maker (software engineer). Though scripting is not new to design, it is only recently that it has started to be regarded as integral to the designer's skill set rather than a technical speciality. Many designers are now aware of its potential, but remain hesitant. This book treats scripting not only as a technical challenge, requiring clear description, guidance and training, but also, and more crucially, answers the question as to why designers should script in the first place, and what the cultural and theoretical implications are.

This book:

- Investigates the application of scripting for productivity, experimentation and design speculation.
- Offers detailed exploration of the scripting of Gaudí's final realised design for the Sagrada Família, leading to file-to-factory digital fabrication.
- Features projects and commentary from over 30 contemporary scripting leaders, including Evan Douglis, Marc Fornes, Sawako Kaijima, Achim Menges, Neri Oxman, Casey Reas and Hugh Whitehead of Foster + Partners.

From reader reviews:

Cheryl Stone:

As people who live in the particular modest era should be up-date about what going on or facts even knowledge to make these keep up with the era that is certainly always change and move ahead. Some of you maybe may update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know what type you should start with. This Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and want in this era.

Steven Purdy:

Do you considered one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) book is readable by you who hate those perfect word style. You will find the details here are arrange for enjoyable looking at experience without leaving perhaps decrease the knowledge that want to provide to you. The writer regarding Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the articles but it just different as it. So , do you even now thinking Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) is not loveable to be your top checklist reading book?

Gary Lopez:

Hey guys, do you really wants to finds a new book to learn? May be the book with the headline Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) suitable to you? The book was written by renowned writer in this era. Typically the book untitled Scripting Cultures: Architectural Design and Programming (Architectural Design Primer)is a single of several books that will everyone read now. This kind of book was inspired a lot of people in the world. When you read this e-book you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, and so all of people can easily to be aware of the core of this reserve. This book will give you a great deal of information about this world now. In order to see the represented of the world on this book.

Miriam Normandin:

A lot of people always spent their own free time to vacation or maybe go to the outside with them friends and family or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity that's look different you can read a book. It is really fun to suit your needs. If you enjoy the book you read you can spent all day long to reading a book. The book Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) it is extremely good to read. There are a lot of people who recommended this book. They

were enjoying reading this book. If you did not have enough space to bring this book you can buy the e-book. You can m0ore simply to read this book through your smart phone. The price is not too expensive but this book has high quality.
