Valorization of Food Processing By-Products (Fermented Foods and Beverages Series)

Valorization of Food Processing By-Products (Fermented Foods and Beverages Series)

Biotechnology has immense potential for resolving environmental problems and augmenting food production. Particularly, it offers solutions for converting solid wastes into value-added items. In food processing industries that generate voluminous by-products and wastes, valorization can help offset growing environmental problems and facilitate the sustainable use of available natural resources. **Valorization of Food Processing By-Products** describes the potential of this relatively new concept in the field of industrial residues management.

The debut book in CRC Press's new *Fermented Foods and Beverages Series*, this volume explores the current state of the art in food processing by-products with respect to their generation, methods of disposal, and problems faced in terms of waste and regulation. It reviews the basic fundamental principles of waste recycling, including process engineering economics and the microbiology and biochemical and nutritional aspects of food processing. It discusses fermentation techniques available for valorization of food processing by-products, enzyme technologies, and analytical techniques and instrumentation. Individual chapters examine the by-products of plant-based and animal-based food industries. The book also delves into socioeconomic considerations and environmental concerns related to food processing by-products. It surveys research gaps and areas ripe for further inquiry as well as future trends in the field.

An essential reference for researchers and practitioners in the food science and food technology industry, this volume is also poised to inspire those who wish to take on valorization of food by-products as a professional endeavor. A contribution toward sustainability, valorization makes maximum use of agricultural produce while employing low-energy and cost-effective processes.

From reader reviews:

James Boyd:

Reading a publication can be one of a lot of exercise that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a guide will give you a lot of new data. When you read a guide you will get new information mainly because book is one of many ways to share the information or even their idea. Second, studying a book will make anyone more imaginative. When you examining a book especially hype book the author will bring one to imagine the story how the people do it anything. Third, you may share your knowledge to other folks. When you read this Valorization of Food Processing By-Products (Fermented Foods and Beverages Series), you may tells your family, friends as well as soon about yours book. Your knowledge can inspire others, make them reading a reserve.

Thomas Moore:

The book untitled Valorization of Food Processing By-Products (Fermented Foods and Beverages Series) contain a lot of information on it. The writer explains your girlfriend idea with easy technique. The language is very easy to understand all the people, so do definitely not worry, you can easy to read that. The book was compiled by famous author. The author will bring you in the new period of literary works. You can read this book because you can please read on your smart phone, or gadget, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can open up their official web-site along with order it. Have a nice learn.

John Keys:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you may have it in e-book way, more simple and reachable. This particular Valorization of Food Processing By-Products (Fermented Foods and Beverages Series) can give you a lot of pals because by you taking a look at this one book you have point that they don't and make anyone more like an interesting person. This specific book can be one of one step for you to get success. This book offer you information that possibly your friend doesn't recognize, by knowing more than various other make you to be great individuals. So , why hesitate? Let us have Valorization of Food Processing By-Products (Fermented Foods and Beverages Series).

Penny Laughlin:

That guide can make you to feel relax. That book Valorization of Food Processing By-Products (Fermented Foods and Beverages Series) was bright colored and of course has pictures on the website. As we know that book Valorization of Food Processing By-Products (Fermented Foods and Beverages Series) has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you and try to like reading in which.
