## **Plant Biotechnology 2002 and Beyond**

The 10th IAPTC&B Congress, Plant Biotechnology 2002 and Beyond, was held June 23-28, 2002, at Disney's Coronado Springs Resort, in Orlando, Florida, USA. It was attended by 1,176 scientists from 54 countries. The best and brightest stars of international plant biotechnology headlined the scientific program. It included the opening address by the President of the IAPTC&B, 14 plenary lectures, and 111 keynote lectures and contributed papers presented in 17 symposia covering all aspects of plant biotechnology. More than 500 posters supplemented the formal program. The distinguished speakers described, discussed and debated not only the best of science that has been done or is being done, but also how the power of plant biotechnology can be harnessed to meet future challenges and needs. The program was focused on what is new and what is exciting, what is state of the art, and what is on the cutting edge of science and technology. In keeping with the international mandate of the IAPTC&B, 73 of the 125 speakers were from outside the United States, representing 27 countries from every region of the world. The 10th IAPTC&B Congress was a truly world-class event.

The IAPTC&B, founded in 1963 at the first international conference of plant tissue culture organized by Philip White in the United States, currently has over 1,500 members in 85 countries. It is the largest, oldest, and the most comprehensive international professional organization in the field of plant biotechnology. The IAPTC&B has served the plant biotechnology community well through its many active national chapters throughout the World, by maintaining and disseminating a membership list and a website, by the publication of an official journal (formerly the Newsletter), and by organizing quadrennial international congresses in France (1970), the United Kingdom (1974), Canada (1978), Japan (1982), the United States (1963, 1986, 2002), The Netherlands (1990), Italy (1994), and Israel (1998). In addition, the IAPTC&B has a long tradition of publishing the proceedings of its congresses. Individually, these volumes have provided authoritative quadrennial reports of the status of international plant biotechnology. Collectively, they document the history of plant biotechnology during the 20th century. They are indeed a valuable resource.

We are pleased to continue this tradition by publishing this proceedings volume of the 10th IAPTC&B Congress. Regrettably, we are not able to publish seven of the lectures in full (only their abstracts are included).

The American and Canadian chapters of the IAPTC&B, the Plant Section of the Society for In Vitro Biology, and the University of Florida hosted the 10th IAPTC&B Congress. The Congress was a true partnership between academia and industry, and was generously supported by both groups (see list of donors/sponsors on back cover). A number of prominent international biotechnology companies and publishers participated in the very successful Science and Technology Exhibit (see accompanying list of exhibitors) The IAPTC&B awarded 84 fellowships to young scientists from 31 countries (see accompanying list of fellowship recipients) to support their participation in the Congress.

### **From reader reviews:**

#### **Geneva Ricks:**

The book Plant Biotechnology 2002 and Beyond gives you the sense of being enjoy for your spare time. You may use to make your capable more increase. Book can to be your best friend when you getting anxiety or having big problem together with your subject. If you can make reading a book Plant Biotechnology 2002 and Beyond to be your habit, you can get more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You may know everything if you like open up and read a publication Plant Biotechnology 2002 and Beyond. Kinds of book are several. It means that, science guide or encyclopedia or other folks. So , how do you think about this reserve?

#### **Danny Jarosz:**

Hey guys, do you wants to finds a new book to see? May be the book with the headline Plant Biotechnology 2002 and Beyond suitable to you? The particular book was written by renowned writer in this era. The actual book untitled Plant Biotechnology 2002 and Beyondis one of several books that everyone read now. This particular book was inspired lots of people in the world. When you read this guide you will enter the new age that you ever know previous to. The author explained their plan in the simple way, and so all of people can easily to comprehend the core of this guide. This book will give you a wide range of information about this world now. So that you can see the represented of the world in this particular book.

#### **Craig Nazario:**

Typically the book Plant Biotechnology 2002 and Beyond has a lot associated with on it. So when you read this book you can get a lot of help. The book was written by the very famous author. This articles author makes some research prior to write this book. This kind of book very easy to read you can find the point easily after perusing this book.

#### **Alan Sarno:**

Are you kind of stressful person, only have 10 or maybe 15 minute in your time to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are having problem with the book than can satisfy your limited time to read it because this all time you only find publication that need more time to be study. Plant Biotechnology 2002 and Beyond can be your answer mainly because it can be read by anyone who have those short time problems.
