**The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research)** Alain Haurie, Laurent Viguier

Climate and economies have interdependent dynamics. Even though the pace of climate change is probably much slower than the speed of adjustment of the world economies, the global climate change impact of economic development and growth has to be controlled and taken into account in the policy assessment process. Integrated assessment models are now trying to capture the different feedbacks that link the climate system and the development of human societies. This book reviews the different approaches used to model these dynamic interactions between climate and economies and proposes new avenues of research in this domain. In fourteen chapters this book deals with various aspects of the building of integrated assessment models, either by coupling economic growth and climate change modules, or using mathematical models of viability or dynamic game theory to represent the interactions between the world regions concerned. It also focuses on more specific economic equilibrium models that can be used to assess international climate policies and it addresses the modelling of impacts of climate change in Switzerland as a test region. This book is the result of several years of joint research in an interdisciplinary project on the human dimension of climate change. It proposes innovative ways to include climate simulation modules in optimal economic growth models; it explores the possible use of computable general economic equilibrium models coupled with paradigms of game theory to assess the dividends of cooperation in climate policies; it reports on the building of multi-region dynamic energy-technology-environment models to assess the possible response of the world energy system to a global cap on GHG emissions, and it shows how to model the impacts of climate change at a regional level. This book is meant to serve as a reference work for researchers and graduate students who engage in interdisciplinary studies at the boundary between Earth and Social sciences.

**From reader reviews:**

**Rodney Wilson:**

Have you spare time to get a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a walk, shopping, or went to often the Mall. How about open or perhaps read a book allowed The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research)? Maybe it is to become best activity for you. You recognize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with their opinion or you have some other opinion?

**Guillermo Behler:**

People live in this new day of lifestyle always aim to and must have the time or they will get great deal of stress from both everyday life and work. So , once we ask do people have time, we will say absolutely yes. People is human not really a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to a person of course your answer can unlimited right. Then ever try this one, reading guides. It can be your alternative inside spending your spare time, the particular book you have read is actually The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research).

**Louise Hacker:**

Do you have something that you prefer such as book? The book lovers usually prefer to opt for book like comic, quick story and the biggest some may be novel. Now, why not striving The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research) that give your fun preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the method for people to know world considerably better then how they react towards the world. It can't be said constantly that reading habit only for the geeky man or woman but for all of you who wants to possibly be success person. So , for all of you who want to start reading as your good habit, it is possible to pick The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research) become your own starter.

**Donald Perkins:**

Many people said that they feel weary when they reading a e-book. They are directly felt the item when they get a half parts of the book. You can choose often the book The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research) to make your own reading is interesting. Your own personal skill of reading talent is developing when you just like reading. Try to choose very simple book to make you enjoy to read it and mingle the idea about book and reading through especially. It is to be 1st opinion for you to like to open up a book and learn it. Beside that the e-book The Coupling of Climate and Economic Dynamics: 22 (Advances in Global Change Research) can to be your brand-new friend when you're sense alone and confuse with what must you're doing of their time.
