## **Collaboration in Education (Routledge Research in Education)**

*Collaboration in Education* establishes a needed framework for school/university collaborations that will be critical for others wishing to reproduce and participate in these partnerships. The contributors explore the elements necessary for sustainable collaboration in order to provide a frame of reference for others doing this work. This volume will help readers to ask the correct questions in thinking through school/university collaboration, such as: Does this collaboration make a true change in the way each parent organization operates in the future? Does it meet the needs of a more complex and changing work environment for universities and schools? Does it impact beyond the participant institutions and inform the field by producing knowledge of use to others? This volume also includes extensive analyses of ongoing school/university projects in the United States, Asia and Europe.
