In turbulent markets you need to become an investment predator. Investment predators create a plan for capturing their prey (prime investment opportunities) while risk is fairly low, and spit the bones out (sell the investment) before they become prey themselves.

*Pounce* describes a system that is neither frantic day trading nor passive buy-and-hold investing. You set up a three-pronged strategy based on quantitative measures of market value, economic direction, and market sentiment, and then choose stocks, exchange traded funds (ETFs), or mutual funds using easy-to-understand criteria. You tweak the system no more than once a month. You've now got the laws of probability in your favor. Recessions, disruptive periods, or bear markets become windows of opportunity.

*Pounce* teaches you with dozens of specific examples how to run your investment life so as to never be the prey again!
