Aesthetic Science: Connecting Minds, Brains, and Experience

Aesthetic Science: Connecting Minds, Brains, and Experience

What do we do when we view a work of art? What does it mean to have an "aesthetic" experience? Are such experiences purely in the eye (and brain) of the beholder? Such questions have entertained philosophers for millennia and psychologists for over a century. More recently, with the advent of functional neuroimaging methods, a handful of ambitious brain scientists have begun to explore the neural correlates of such experiences. This book offers an introduction to the way art is perceived, interpreted, and felt and approaches these mindful events from a multidisciplinary perspective.
