**Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) A. A. Kiss**

This book is among the first to address the novel process intensification technologies for biodiesel production, in particular the integrated reactive separations. It provides a comprehensive overview illustrated with many industrially relevant examples of novel reactive separation processes used in the production of biodiesel (e.g. fatty acid alkyl esters): reactive distillation, reactive absorption, reactive extraction, membrane reactors, and centrifugal contact separators. Readers will also learn about the working principles, design and control of integrated processes, while also getting a relevant and modern overview of the process intensification opportunities for biodiesel synthesis.

Biodiesel is a biodegradable and renewable fuel that currently enjoys much attention. In spite of the recent advances, the existing biodiesel processes still suffer from problems associated with the use of homogeneous catalysts (e.g. salt waste streams) and the key limitations imposed by the chemical reaction equilibrium, thus leading to severe economic and environmental penalties. The integration of reaction and separation into one operating unit overcomes equilibrium limitations and provides key benefits such as low capital investment and operating costs. Many of these processes can be further enhanced by heat-integration and powered by heterogeneous catalysts, to eliminate all conventional catalyst related operations, using the raw materials efficiently and the reaction volume, while offering high conversion and selectivity, and significant energy savings.

The targeted audience of this book includes both academia (students and researchers) and industry (project leaders, technology managers, researchers, biodiesel producers, and equipment suppliers).

### **From reader reviews:**

#### **Elias Rosser:**

The book Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) make you feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can being your best friend when you getting pressure or having big problem together with your subject. If you can make reading through a book Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) being your habit, you can get a lot more advantages, like add your personal capable, increase your knowledge about a number of or all subjects. You can know everything if you like available and read a book Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology). Kinds of book are a lot of. It means that, science e-book or encyclopedia or others. So , how do you think about this book?

#### **Richard Ma:**

The feeling that you get from Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) could be the more deep you searching the information that hide within the words the more you get serious about reading it. It doesn't mean that this book is hard to understand but Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) giving you buzz feeling of reading. The writer conveys their point in certain way that can be understood by simply anyone who read the idea because the author of this publication is well-known enough. This particular book also makes your personal vocabulary increase well. Therefore it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this specific Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) instantly.

#### **Homer Simon:**

This Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) tend to be reliable for you who want to be considered a successful person, why. The key reason why of this Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) can be one of several great books you must have will be giving you more than just simple examining food but feed you actually with information that might be will shock your earlier knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed versions. Beside that this Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) forcing you to have an enormous of experience for instance rich vocabulary, giving you test of critical thinking that we understand it useful in your day task. So , let's have it appreciate reading.

**Brandon Seymour:**

You will get this Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) by visit the bookstore or Mall. Just viewing or reviewing it could possibly to be your solve problem if you get difficulties on your knowledge. Kinds of this guide are various. Not only by written or printed but also can you enjoy this book simply by e-book. In the modern era including now, you just looking by your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose right ways for you.
