## Early Responses to the Periodic System

The reception of the periodic system of elements has received little attention among scientists and historians alike. While many historians have studied Mendeleev's discovery of the periodic system, few have analyzed the ways in which the scientific community perceived and employed it. American historian of science Stephen G. Brush concluded that the periodic law had been generally accepted in the United States and Britain, and has suggested the need to extend this study to other countries.

In *Early Responses to the Periodic System*, renowned historians of science Masanori Kaji, Helge Kragh, and G?bor Pall? present the first major comparative analysis on the reception, response, and appropriation of the periodic system of elements among different nation-states. This book examines the history of its pedagogy and popularization in scientific communities, educational sectors, and popular culture from the 1970s to the 1920s. Fifteen notable historians of science explore the impact of Mendeleev's discovery in eleven countries (and one region) central to chemical research, including Russia, Germany, the Czech lands, and Japan, one of the few nation-states outside the Western world to participate in the nineteenth-century scientific research.

The collection, organized by nation-state, explores how local actors regarded the new discovery as law, classification, or theoretical interpretation. In addition to discussing the appropriation of the periodic system, the book examines meta-physical reflections of nature based on the periodic system outside the field of chemistry, and considers how far humans can push the categories of "response" and "reception." *Early Responses to the Periodic System* provides a compelling read for anyone with an interest in the history of chemistry and the Periodic Table of Elements.

### **From reader reviews:**

#### **Orlando Bush:**

The book Early Responses to the Periodic System gives you the sense of being enjoy for your spare time. You may use to make your capable a lot more increase. Book can to get your best friend when you getting pressure or having big problem with your subject. If you can make reading a book Early Responses to the Periodic System to be your habit, you can get far more advantages, like add your own capable, increase your knowledge about several or all subjects. It is possible to know everything if you like available and read a guide Early Responses to the Periodic System. Kinds of book are several. It means that, science publication or encyclopedia or others. So , how do you think about this e-book?

#### **Michelle Seidl:**

What do you regarding book? It is not important with you? Or just adding material when you want something to explain what the one you have problem? How about your extra time? Or are you busy person? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. They should answer that question since just their can do that. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this particular Early Responses to the Periodic System to read.

#### **Wayne McKnight:**

In this 21st centuries, people become competitive in every single way. By being competitive at this point, people have do something to make them survives, being in the middle of the actual crowded place and notice through surrounding. One thing that often many people have underestimated the item for a while is reading. Yes, by reading a publication your ability to survive raise then having chance to remain than other is high. For you who want to start reading a new book, we give you this particular Early Responses to the Periodic System book as nice and daily reading e-book. Why, because this book is usually more than just a book.

#### **Sarah Heath:**

That book can make you to feel relax. This kind of book Early Responses to the Periodic System was colourful and of course has pictures on there. As we know that book Early Responses to the Periodic System has many kinds or style. Start from kids until teens. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for you and try to like reading that.
