## Neoconstructivism: The New Science of Cognitive Development Scott Johnson

Arguments over the developmental origins of human knowledge are ancient, founded in the writings of Plato, Aristotle, Descartes, Hume, and Kant. They have also persisted long enough to become a core area of inquiry in cognitive and developmental science. Empirical contributions to these debates, however, appeared only in the last century, when Jean Piaget offered the first viable theory of knowledge acquisition that centered on the great themes discussed by Kant: object, space, time, and causality. The essence of Piaget's theory is constructivism: The building of concepts from simpler perceptual and cognitive precursors, in particular from experience gained through manual behaviors and observation.

The constructivist view was disputed by a generation of researchers dedicated to the idea of the "competent infant," endowed with knowledge (say, of permanent objects) that emerged prior to facile manual behaviors. Taking this possibility further, it has been proposed that many fundamental cognitive mechanisms -- reasoning, event prediction, decision-making, hypothesis testing, and deduction -- operate independently of all experience, and are, in this sense, innate. The competent-infant view has an intuitive appeal, attested to by its widespread popularity, and it enjoys a kind of parsimony: It avoids the supposed philosophical pitfall posed by having to account for novel forms of knowledge in inductive learners. But this view leaves unaddressed a vital challenge: to understand the mechanisms by which new knowledge arises.

This challenge has now been met. The neoconstructivist approach is rooted in Piaget's constructivist emphasis on developmental mechanisms, yet also reflects modern advances in our understanding of learning mechanisms, cortical development, and modeling. This book brings together, for the first time, theoretical views that embrace computational models and developmental neurobiology, and emphasize the interplay of time, experience, and cortical architecture to explain emergent knowledge, with an empirical line of research identifying a set of general-purpose sensory, perceptual, and learning mechanisms that guide knowledge acquisition across different domains and through development.

### **From reader reviews:**

#### **Doris Stanford:**

Now a day those who Living in the era where everything reachable by match the internet and the resources inside can be true or not involve people to be aware of each info they get. How people have to be smart in receiving any information nowadays? Of course the answer is reading a book. Studying a book can help men and women out of this uncertainty Information particularly this Neoconstructivism: The New Science of Cognitive Development book as this book offers you rich details and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it as you know.

#### **Brandi Huff:**

Many people spending their time period by playing outside together with friends, fun activity along with family or just watching TV all day long. You can have new activity to invest your whole day by reading a book. Ugh, do you consider reading a book can actually hard because you have to use the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smart phone. Like Neoconstructivism: The New Science of Cognitive Development which is finding the e-book version. So , try out this book? Let's see.

#### **Edward Johnson:**

As we know that book is very important thing to add our knowledge for everything. By a guide we can know everything we wish. A book is a range of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This e-book Neoconstructivism: The New Science of Cognitive Development was filled about science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading the book. If you know how big advantage of a book, you can experience enjoy to read a e-book. In the modern era like now, many ways to get book that you just wanted.

#### **Angela Joseph:**

Reading a book make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is created or printed or illustrated from each source this filled update of news. Within this modern era like currently, many ways to get information are available for you actually. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just in search of the Neoconstructivism: The New Science of Cognitive Development when you needed it?
