Fundamentals of Food Biotechnology Byong H. Lee

Food biotechnology is the application of modern biotechnological techniques to the manufacture and processing of food, for example through fermentation of food (which is the oldest biotechnological process) and food additives, as well as plant and animal cell cultures. New developments in fermentation and enzyme technological processes, molecular thermodynamics, genetic engineering, protein engineering, metabolic engineering, bioengineering, and processes involving monoclonal antibodies, nanobiotechnology and quorum sensing have introduced exciting new dimensions to food biotechnology, a burgeoning field that transcends many scientific disciplines.

Fundamentals of Food Biotechnology, 2nd edition is based on the author's 25 years of experience teaching on a food biotechnology course at McGill University in Canada. The book will appeal to professional food scientists as well as graduate and advanced undergraduate students by addressing the latest exciting food biotechnology research in areas such as genetically modified foods (GMOs), bioenergy, bioplastics, functional foods/nutraceuticals, nanobiotechnology, quorum sensing and quenching. In addition, cloning techniques for bacterial and yeast enzymes are included in a "New Trends and Tools" section and selected references, questions and answers appear at the end of each chapter.

This new edition has been comprehensively rewritten and restructured to reflect the new technologies, products and trends that have emerged since the original book. Many new aspects highlight the short and longer term commercial potential of food biotechnology.

From reader reviews:

Leslie Hackett:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite guide and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Fundamentals of Food Biotechnology. Try to face the book Fundamentals of Food Biotechnology as your pal. It means that it can to become your friend when you sense alone and beside that of course make you smarter than ever before. Yeah, it is very fortunated to suit your needs. The book makes you much more confidence because you can know everything by the book. So , we need to make new experience and also knowledge with this book.

Edward Bastian:

Book is actually written, printed, or illustrated for everything. You can learn everything you want by a book. Book has a different type. We all know that that book is important matter to bring us around the world. Beside that you can your reading talent was fluently. A reserve Fundamentals of Food Biotechnology will make you to always be smarter. You can feel much more confidence if you can know about anything. But some of you think this open or reading a new book make you bored. It isn't make you fun. Why they might be thought like that? Have you searching for best book or acceptable book with you?

Joel Peterson:

Nowadays reading books become more and more than want or need but also get a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The data you get based on what kind of e-book you read, if you want send more knowledge just go with knowledge books but if you want truly feel happy read one with theme for entertaining such as comic or novel. The actual Fundamentals of Food Biotechnology is kind of book which is giving the reader erratic experience.

Juan Gilbert:

Reading a book tends to be new life style with this era globalization. With reading through you can get a lot of information which will give you benefit in your life. With book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire all their reader with their story or their experience. Not only situation that share in the publications. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors in this world always try to improve their expertise in writing, they also doing some investigation before they write to the book. One of them is this Fundamentals of Food Biotechnology.
