A Topological Aperitif (Springer Undergraduate Mathematics Series)

Stephen Huggett, David Jordan

A Topological Aperitif (Springer Undergraduate Mathematics Series) Stephen Huggett, David Jordan

This is a book of elementary geometric topology, in which geometry, frequently illustrated, guides calculation. The book starts with a wealth of examples, often subtle, of how to be mathematically certain whether two objects are the same from the point of view of topology.

After introducing surfaces, such as the Klein bottle, the book explores the properties of polyhedra drawn on these surfaces. More refined tools are developed in a chapter on winding number, and an appendix gives a glimpse of knot theory.

Numerous examples and exercises make this a useful textbook for a first undergraduate course in topology, providing a firm geometrical foundation for further study. For much of the book the prerequisites are slight, though, so anyone with curiosity and tenacity will be able to enjoy the Aperitif.

"...distinguished by clear and wonderful exposition and laden with informal motivation, visual aids, cool (and beautifully rendered) pictures...This is a terrific book and I recommend it very highly."

MAA Online

"Aperitif conjures up exactly the right impression of this book. The high ratio of illustrations to text makes it a quick read and its engaging style and subject matter whet the tastebuds for a range of possible main courses."

"A Topological Aperitif provides a marvellous introduction to the subject, with many different tastes of ideas."

Professor Sir Roger Penrose OM FRS, Mathematical Institute, Oxford, UK

From reader reviews:

Jose Banks:

Now a day individuals who Living in the era everywhere everything reachable by connect with the internet and the resources inside it can be true or not call for people to be aware of each facts they get. How many people to be smart in receiving any information nowadays? Of course the solution is reading a book. Reading through a book can help individuals out of this uncertainty Information especially this A Topological Aperitif (Springer Undergraduate Mathematics Series) book as this book offers you rich details and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it as you know.

Julie Moore:

The reason why? Because this A Topological Aperitif (Springer Undergraduate Mathematics Series) is an unordinary book that the inside of the publication waiting for you to snap this but latter it will shock you with the secret that inside. Reading this book beside it was fantastic author who have write the book in such amazing way makes the content inside of easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you for not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of gains than the other book possess such as help improving your skill and your critical thinking approach. So , still want to postpone having that book? If I were being you I will go to the reserve store hurriedly.

John Silver:

You may spend your free time you just read this book this reserve. This A Topological Aperitif (Springer Undergraduate Mathematics Series) is simple to develop you can read it in the playground, in the beach, train and soon. If you did not get much space to bring the actual printed book, you can buy the particular e-book. It is make you quicker to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Wendell Radford:

What is your hobby? Have you heard that question when you got learners? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person just like reading or as reading through become their hobby. You have to know that reading is very important and also book as to be the factor. Book is important thing to provide you knowledge, except your current teacher or lecturer. You find good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is niagra A Topological Aperitif (Springer Undergraduate Mathematics Series).
