## **Identification and Management of Distributed Data: NGN, Content-Centric Networks and the Web**

Giovanni Bartolomeo, Tatiana Kovacikova

Although several books and academic courses discuss data management and networking, few of them focus on the convergence of networking and software technologies for identifying, addressing, and managing distributed data. Focusing on this convergence, **Identification and Management of Distributed Data: NGN, Content-Centric Networks and the Web** collates and describes the various distributed data management technologies to help readers from various backgrounds understand the common aspects that govern distributed data management.

With a focus on the primary problems in identifying, addressing, and managing information in a distributed environment, the book guides you through the discovery of distributed data management on the web, in next-generation networks (NGNs), and in new content-centric networking paradigms. It includes case studies from the Palo Alto Research Center and the Semantic Web Education and Outreach Interest Group that illustrate the convergence between software engineering and networking technologies.

Derived from academic courses, ongoing research, and the latest standardization initiatives, the book explains how the various layers of the existing Internet protocol stack already provide most of the functions that information engineers need to design efficient systems. Although the subject is broad, the book provides helpful insights into a number of critical technologies to provide you with the foundation required to build and deploy more efficient data interoperability paradigms in next-generation networks.

### **From reader reviews:**

#### **Glen Hoffman:**

Spent a free time for you to be fun activity to do! A lot of people spent their spare time with their family, or all their friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Might be reading a book can be option to fill your free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the e-book untitled Identification and Management of Distributed Data: NGN, Content-Centric Networks and the Web can be great book to read. May be it could be best activity to you.

#### **Fredrick Alfred:**

Often the book Identification and Management of Distributed Data: NGN, Content-Centric Networks and the Web has a lot of information on it. So when you read this book you can get a lot of profit. The book was compiled by the very famous author. Tom makes some research just before write this book. This particular book very easy to read you may get the point easily after perusing this book.

#### **Michael Garcia:**

People live in this new morning of lifestyle always try to and must have the extra time or they will get great deal of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely of course. People is human not only a robot. Then we question again, what kind of activity have you got when the spare time coming to an individual of course your answer will certainly unlimited right. Then ever try this one, reading textbooks. It can be your alternative within spending your spare time, the actual book you have read is actually Identification and Management of Distributed Data: NGN, Content-Centric Networks and the Web.

#### **Melinda Miller:**

Many people spending their time by playing outside having friends, fun activity using family or just watching TV the whole day. You can have new activity to pay your whole day by reading through a book. Ugh, ya think reading a book really can hard because you have to accept the book everywhere? It alright you can have the e-book, getting everywhere you want in your Smart phone. Like Identification and Management of Distributed Data: NGN, Content-Centric Networks and the Web which is finding the e-book version. So , try out this book? Let's notice.
