The Child's World: The Comprehensive Guide to Assessing Children in Need Second Edition Jan Horwath

This new and updated edition of the best-selling book on assessing children in need and their families integrates practice, policy and theory to produce a comprehensive and multidisciplinary guide to all aspects of assessment.

The Child's World not only provides an explanation of the Framework for the Assessment of Children in Need and their Families, but also offers a wealth of information on how to use it sensitively and effectively. The Child's World explores the implications of recent legislation, including the Children Act 2004, and national guidance for assessment practice. The contributors have drawn on the latest research, best practice and lessons learnt over the past decade of Framework implementation to equip practitioners, from different disciplines, to identify the developmental needs of children, assess parental capacity and evaluate the impact of family, economic and environmental factors on the carer's ability to meet the needs of the child.

This book is essential reading for all practitioners, managers, trainers and educators in children's and adult services who use the Framework, and will also be a valued source of knowledge and guidance for those assessing children's needs in legislative contexts outside of England.
